Spending time with pet

WORK EXPERIENCE

Fullstack intern
The SmartBridge

05/2023 - 11/2023   *Remote*

Achievements/Tasks

- Responsible for developing robust backend systems using the **MERN stack** and designing **RESTful APIs**. Implemented efficient data handling and management using **Express.js** and **Node.js** on the backend, integrating with **MongoDB** for seamless data storage.
- Provided mentorship in backend development methodologies, conducted thorough code reviews, and facilitated educational sessions for team enhancement.
- Played a key role in project management activities, including planning and collaborating with team members to ensure project success.

Frontend developer
Analyesed, Variant Labs

05/2022 - 08/2022   *Remote*

Achievements/Tasks

- Worked as a front-end developer and tester in a team on **live projects**, contributing to the successful creation of modules that improved **user experiences**.
- Gained skills in front-end development, back-end web development, query languages, **HTML5, MySQL, SQL, PHP**, responsive web design, and computer programming.

PROJECTS

Chat App
- This project is a chat application built using **WebSocket.IO**, a JavaScript library for real-time web applications. The application allows two users to communicate with each other in **real time, sending messages back and forth instantly**. Additionally, when a **user is online**, it reflects on their **profile picture.** You can experience the live version by clicking on the following link: LINK

Movies App
- The ReactJS Movie and TV Show Review Showcase, powered by React, integrates external APIs for movies and TV data. It delivers user-friendly interfaces. Using **React, React Router, and CSS/SCSS**, it combines data presentation and React proficiency in a compact, user-centric web app. Github link

Weather App
- This is the Weather App designed by the help of **HTML, CSS, JavaScript and Weather API by Rapid Api**. It show all the information about the particular place like min and max temperatures, humidity info, etc entered by the user. Github link
